What is emergency temporary housing?

- Based on the Disaster Relief Act, the prefecture secures dwellings for disaster-stricken households that do not have housing as a result of having lost their homes in the Great East Japan Earthquake.

- Under the Disaster Relief Act, we have constructed and provided temporary (container-type) housing, but because the damage caused by the Great East Japan Earthquake was extensive, and many people lost their residences in disaster-affected municipalities, we have also provided apartment-type housing through the prefecture as an alternative option. Existing housing resources such as disaster public housing are also handled in the same way to maximize their effective use.

Note:
 With respect to the publication of these figures, in order to prevent determination of the identities of those listed here through comparison, the following measures have been taken.

(1) When the number of suicides in a particular municipality is 1 or 2: only the breakdown of the month and year of the suicide, date, time, gender, age group, and presence or absence of other individuals in the home has been publicized.

(2) Even when figures are not 1 or 2 in a particular column, if comparison with other columns would make it clear that a particular figure was 1 or 2: figures have not been published.
