※1 Other temporary housing includes public housing, public servant housing, UR rental housing, etc.

※2 “Number of provided units (houses)” is the number of existing container-type temporary housing units, excluding the number of units that were dismantled due to the implementation of disaster prevention group relocation promotion projects, etc., from the number of maintained units (22,095 houses).

Emergency temporary housing is as follows:

- Housing provided by the prefecture based on the Disaster Relief Act to secure housing for households affected by the Great East Japan Earthquake, where houses were completely destroyed, completely burned down, or washed away, and where the resident has no home in which to reside.
- The Disaster Relief Act envisioned constructing emergency temporary housing (container-type temporary housing). However, due to the unprecedented extensive damage of the Great East Japan Earthquake and the loss of homes by many residents, the local actioning government (the prefecture) provided “apartment-type rental housing.” Here, private rental properties were rented as an emergency temporary housing equivalent to container-type temporary housing. Other existing housing resources, such as public housing, was treated in the same way and was effectively utilized.
